

Cubitainer®

Monomaterial cost-saving packaging

Product Features

The Cubitainer® is a rigid packaging alternative that can promote sustainability while reducing transportation and storage costs.

Lightweight

Eco-Friendly

Durable

Treatment Options

- Monomaterial
- Lightweight
- Durable
- Stackable
- 97-100% evacuation rate
- Treatment and barrier options
- Customizable
- Handle option
- Amber option
- Capable of shipping hazardous materials

Stackable

Knock-down format significantly minimizes storage space

Handle Option

Amber Option

Product Specifications

- LDPE
- Optional treatments including coating, fluorination, sterilization and gamma irradiation
- Standard size ranges: 1L to 20L (1Qt. to 5Gal)

Customization available

- Standard neck finish: 38mm or 63mm
Customization available
- Fitments: Various standard size fitments available
Customization available
- Select from two formats
Knock-Down: Deflated and stacked to minimize handling costs
UN and non-UN cartons available
Assembled: Inflated and placed in a carton ready for filling

NEXT100 Sustainability

Vision into the Future

Recycle

Monomaterial Cubitainer® optimizes recyclability.

Reduce Plastic Use

Changing from the open pail rigid container to the Cubitainer® can reduce plastic use by 80%.

Reduce Carbon Footprint

Stackable design gives a high product-to-packaging ratio to minimize dead space. The Cubitainer® uses 7 times less space than the blow-molded container.

That is only 1 truck instead of 7 trucks.

Cubitainer®

Blow Molded Rigid Packaging

With more than 100 years of experiences, we have dedicated R&D teams globally to work with you to find the right products. Contact us today to find out how we can help.
